

OPERATIONS

STAKEHOLDER – JON BERGQUIST

Summary: Church systems and hierarchy should serve and protect the Church's mission.

****Accomplishments to Celebrate****

1. Conduct an energy audit to determine the efficiency of building systems.
2. Design and install a second projector and video screen to allow easier participation in church services.
3. Maximize energy savings by installing LED lighting systems and WIFI thermostat technology to manage HVAC systems.

****Goals and Next Steps****

1. Begin development of a long term plan for facility maintenance.
2. Work with Ministry team to design and construct a Welcome Center allowing increased involvement in ministry programs.
3. Complete installation of a fob based electronic access system beginning with Sunshine and developing additional systems as deemed appropriate.
